It has been established that the Central Committee has not obtained full participation by workers in mass meetings at the plants, has not checked on the implementation of its own decisions, or insured development of self-criticism within its own ranks.

In view of the above, the Presidium of the VIsSPS considers the work of the Central Committee of the Automobile and the Tractor Workers' Union unsatisfactory, and to charge its presidium and chairman, Elinev, with eliminating the shortcomings enumerated within the shortest possible time; a detailed list of measures to that effect is prescribed. In addition, the Presidium calls on Akepev, Minister of Automobile and Tractor Industry, to take measures for the full implementation of the 1949 plan. These include administrative pressure on the management of the Bearing Trust to carry out the decision of the VIsSPS concerning housing construction for State Bearing Plants No 3, No 4 and others.

At the same time the Presidium recommends that cultural facilities of the following plants be completed: Gorkiy Automobile Plant imeni Molotov, Stalin-grad and Khar'kov Tractor plants. It also recommends that labor and sanitation conditions be thoroughly overhauled at the Chelyabinsk Press Forging Plant and the State Bearing Plant No 8, in addition to those mentioned.
